Experience

M-khan Softwebs   **2022**
System Administrator

Optimized network performance: Implemented strategies to streamline network operations, leading to a 35% increase in efficiency.

Enhanced IT support: Collaborated with IT teams to swiftly resolve network problems, reducing downtime by 45%.

Proactive system maintenance: Identified and addressed potential system issues before they escalated, resulting in a 25% decrease in IT-related disruptions.

Backend Engineer

Optimized network performance through strategic implementations, resulting in increase in efficiency.

Education

Google   Digital Marketing

Successfully completed a part-time digital marketing program while maintaining a full-time position as a System Admin. Acquired practical skills in ethical hacking and digital marketing, including [specific skills]. This diverse skill set will equip me to contribute meaningfully to cybersecurity initiatives, both technical and public-facing.

Cisco   Certified Information Systems Security Professional (CISSP)

Successfully completed a rigorous part-time certification program while maintaining a demanding full-time role, demonstrating exceptional time management and dedication to professional development.

Cisco   Cybersecurity and Ethical Hacking

The certification substantially enhanced my Ethical Hacking skills and provided invaluable insights into Cybersecurity. This directly contributed to my ability to effectively mitigate cyber attacks. Moreover, I gained practical experience in ethical hacking, refining my techniques and solidifying my understanding of cybersecurity best practices.
